

# Product catalogue

Czech producer of carts, furniture and accessories for  
healthcare and social services

# About us

We offer cabinets in painted steel and stainless steel including assemblies, carts with drawers, roller shutters, shelves or documentation. Also mobile equipment for operating theatres, stainless steel brackets and stands, carts for handling laundry and waste, tables and other furniture.

We are able to furnish complete rooms, such as nurses' rooms, doctors' offices, laboratories, pharmacies, catering facilities or technical rooms. Our technicians can carry out a survey of the premises and create an individual design solution if required.

Klaro is a traditional Czech manufacturer of carts, furniture and accessories for healthcare, social services and other industries. The company was founded in 1994. It is constantly expanding and growing dynamically without having to rely on foreign capital. In its more than 30-year history, it has managed to take a leading position in the Czech market, as well as penetrate markets abroad, thanks to its emphasis on product quality.

We export to more than 30 countries worldwide. Klaro's main products include furniture and carts for healthcare and social care facilities, including a wide range of accessories and attachments.

# MODULE SYSTEM

A highly variable modular system comprising robust metal multifunctional cabinets, carts and racks adapted to allow shared use of modular baskets and facilitate clear storage of a wide variety of medical supplies.

It provides variability and versatility allowing the system to be adapted to any interior, possibility of sharing the modular baskets between different types of furniture, using labels to facilitate sophisticated organization of the stored material.

The colour elements allow creation of completely unique and original colour combinations.

We now offer the following optional colour elements:

- Coloured drawer faces and handle covers
- Coloured protective corners
- Coloured bumpers on BASIC and PROFi carts
- Coloured covers of ergonomic push handles

# MULTIFUNCTIONAL CABINETS

We offer cabinets and cabinet assemblies made of steel with antimicrobial coating or stainless steel with the possibility of individual solutions.

The cabinets are characterized by a durable and robust construction, allow the use of lockable solid or glazed doors, offer the possibility of using modular baskets or shelves and can be adapted according to the customer's needs.

Individual colour combinations can be specified according to customers' requirements. The cabinets can be combined in any configuration.

# MULTIFUNCTIONAL CARTS

The products that most characterise our focus include carts for storage and transport of medical supplies, which can be fitted with a wide range of accessories. These include, for example, boxes for medicines, disposable glove holders, folding tables, ampoule breakers, containers for used needles, baskets, storage pockets, holders for infusions or disinfectants and many other types of accessories.

The use of innovative push handles provide even better manoeuvrability and variability of the drawer layout allows them to be adapted for specific applications.

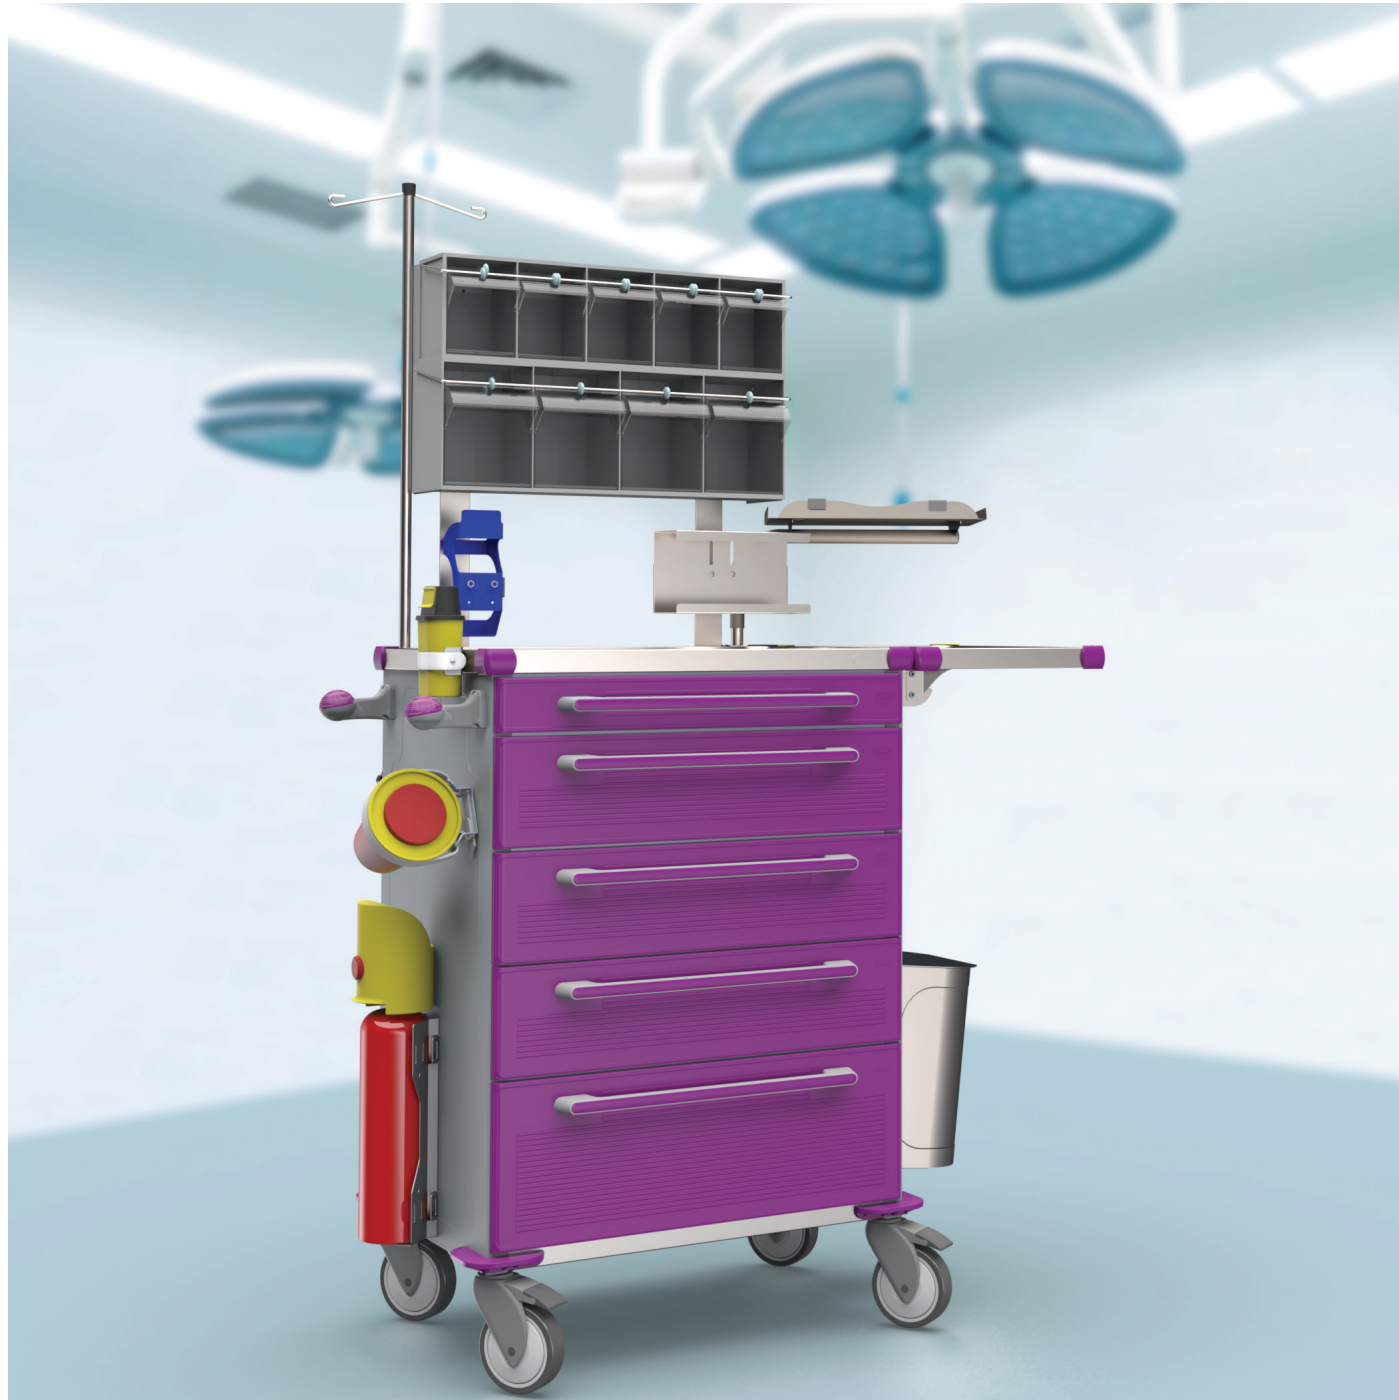

Our mobile cabinets and multifunctional carts are also designed for transport of materials. They allow use of modular baskets or shelves. They can be fitted with roller shutters or lockable doors.

Cabinets and carts are offered in several variants and it is possible to design and manufacture atypical versions according to individual customers' needs.

# MULTIFUNCTIONAL CARTS

Our medical carts for emergency care or for use in operating theatres allow for installation of a wide range of accessories such as medication boxes, ampoule breakers, resuscitation pads, electrical outlets, oxygen bottle holders, infusion holders and other accessories.

Our range of products includes caregiving carts, anesthesiology carts, medicine carts, bandage carts, resuscitation carts, doctor visit carts, plastering carts or carts for pathology.

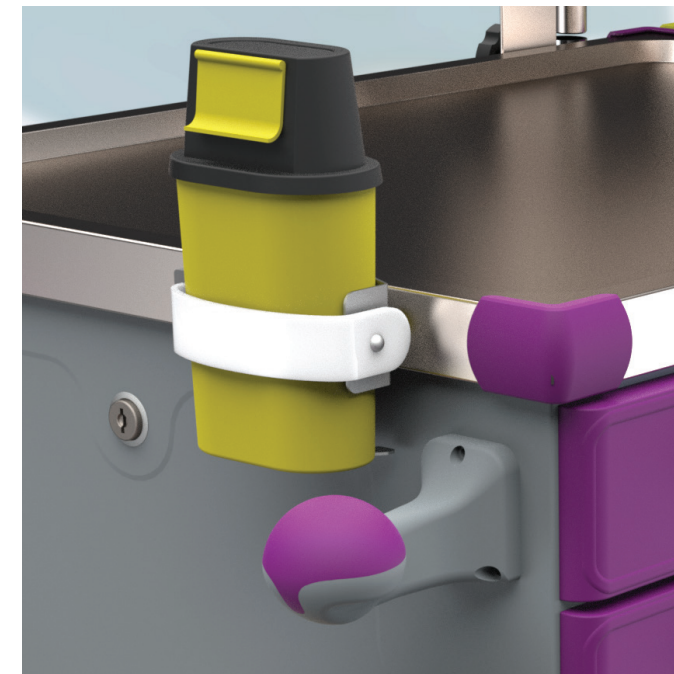

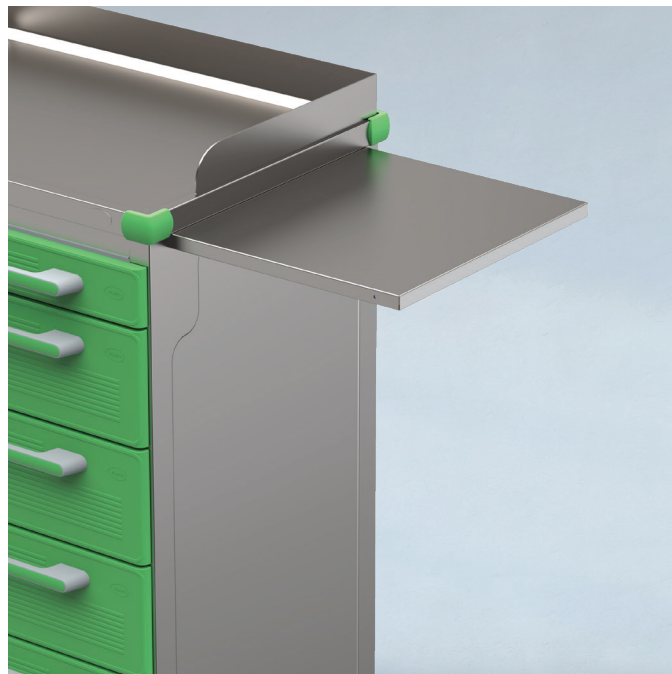

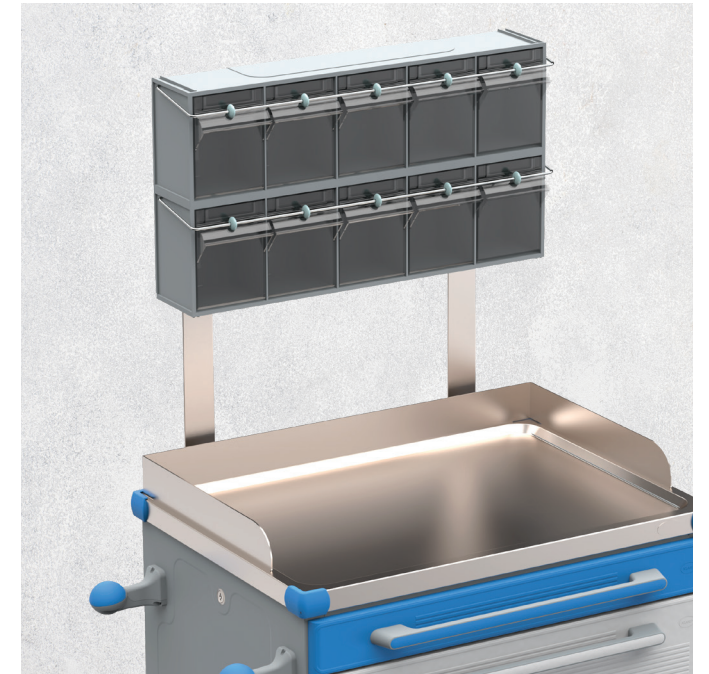

The room service and nursing carts are fitted with wheels for hard or soft surfaces and customers can choose a version with or without doors and lockable doors. The room service carts can be supplemented with bag holders or shelves.

The carts can be equipped with different worktops - stainless steel worktop fitted with an anti-vibration brace with an optional raised rim or plastic worktop with a fixed rim.

# ACCESSORIES FOR CARTS

Multifunctional carts can be equipped with accessories, designed for various purposes. Carts for nursing services, anaesthesiology, transport of medicines, transport of dressing material, resuscitation, as well as visiting or plastering carts. Accessories for carts allowing to customize the carts for any purpose according to customers' requirements.

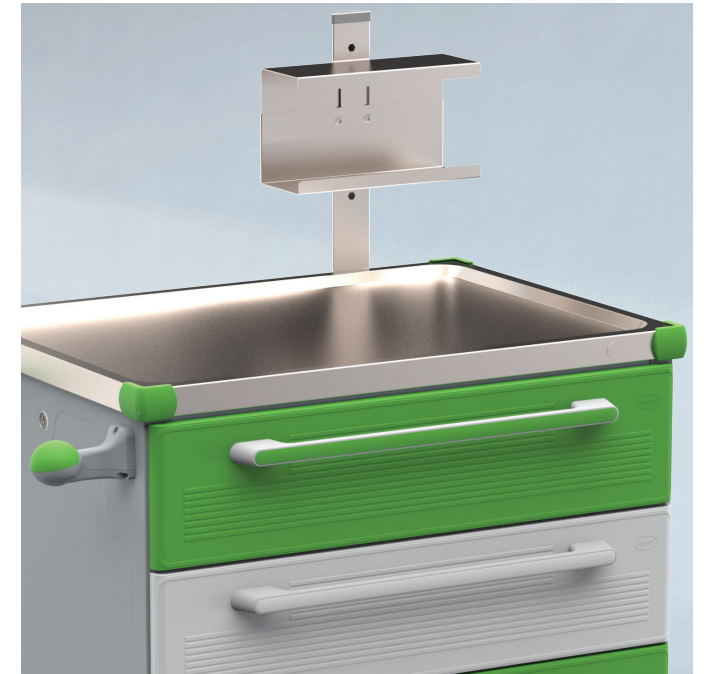

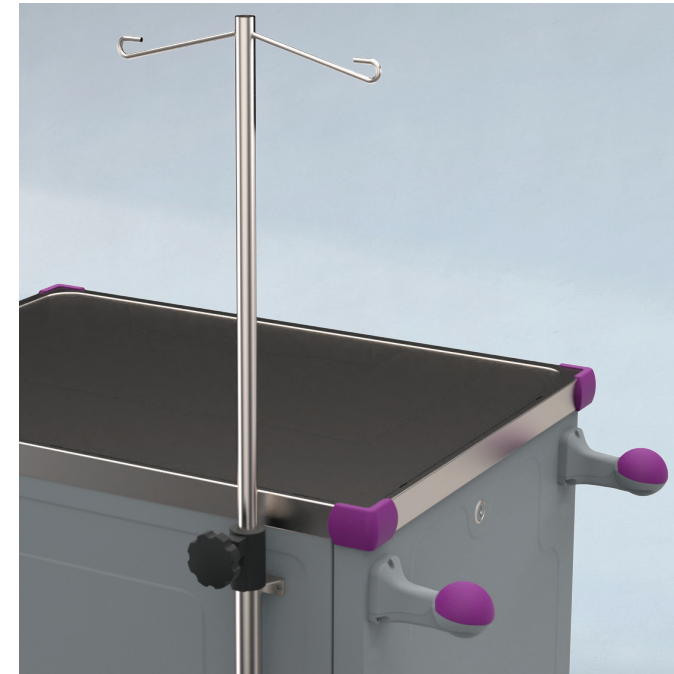

Accessories include:

Bag holders, trays, pull-out desks, folding tables

Disinfection holders, boxes, ampoule breakers, waste containers

# ACCESSORIES FOR CARTS

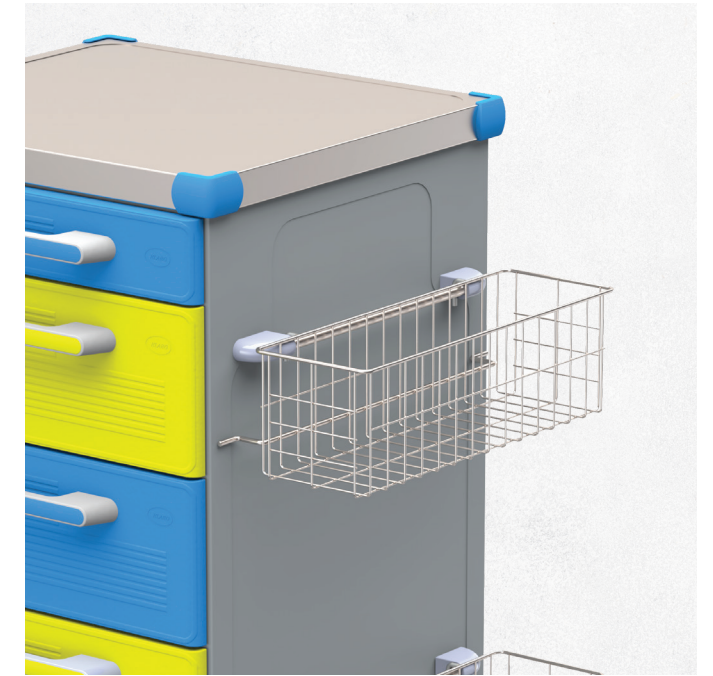

Swinging tables, cabinets, removable shelves, containers for used needles

Infusion holders, glove holders, oxygen bottle holders, resuscitation pads

# ACCESSORIES FOR CARTS

Power strips, pockets for documents, label holders, module basket holders

Side boxes, wire baskets, laptop drawers, special equipment holders, LED lamps

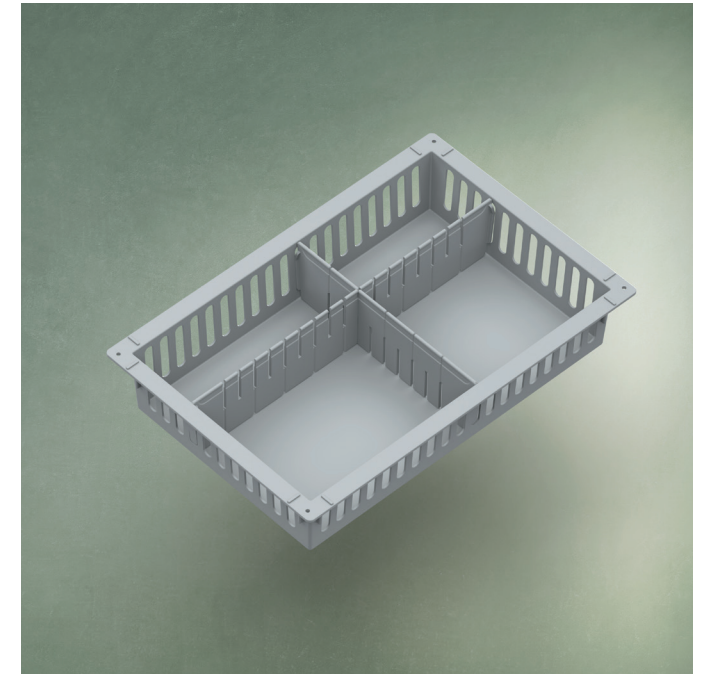

# MODULE SYSTEM BASKETS

Module system baskets provide the possibility of sharing the baskets between different types of furniture. Baskets can be labelled with labels to facilitate organization of stored materials.

Module baskets can be variably divided into compartments using partitions. The baskets are offered in different dimensions and depths and their use is very flexible.

# UNI-TRANS CARTS

These carts are used for transport of materials stored in the module system baskets. The carts are equipped with plastic runners for inserting the baskets. They allow easy handling thanks to swivel castors equipped with brakes.

There are several variants of these carts with different dimensions and capacities. Modular baskets of different depths can be stored simultaneously in the cart.

# PLATE CARTS

For distribution of food and beverages or materials, stainless steel plate carts with fixed or removable plates are used. They are offered in a variety of sizes. They are characterised by a high load capacity of up to 200 kilograms and a robust design. As standard they are fitted with casters for quiet handling, 2 of which are fitted with brakes.

Our drawer plate carts are a combination of a plate cart and drawers for storing materials or baskets. A wide range of additional accessories can again be installed on these carts.

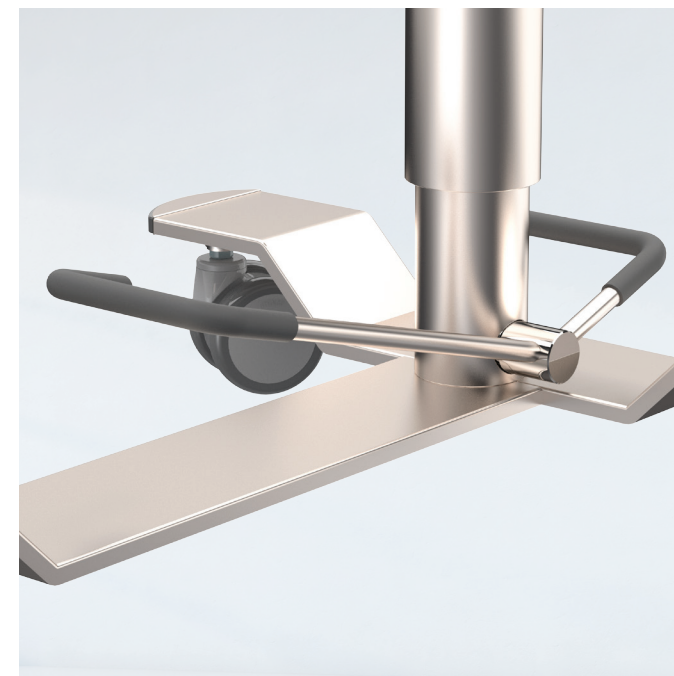

Possible choice of colours for drawers, handles and protective elements.

We also manufacture fully adjustable dining tables for patient room equipment. The tables have an antimicrobial treatment, can be equipped with storage baskets and their mobility is ensured by the use of casters equipped with brakes.

# INSTRUMENTATION TABLES

Our products for operating theatres also include instrumentation tables with manual or hydraulic control. Of course, the design is created for safe operation of the operating theatre and the possibility of thorough sterilization.

Some tables are equipped with a hydraulic lifting system, which facilitates handling of the table. The hydraulic telescopic system is protected against hydraulic fluid leakage. The cart plate is rotatable and allows 360° adjustment. The cart wheels are equipped with brakes to ensure safety.

# INFECTIOUS WASTE HANDLING

We also offer products for handling infectious waste. These include stainless steel aseptic basins, stainless steel containers, carts for transporting infectious waste bags with the possibility of closing the bag, stainless steel waste bins or mobile bag stands with foot-operated lids.

All our products meet high safety standards for containment of hazardous materials and for easy cleaning and disinfection.

# INFUSION STANDS / HOLDERS

The upgraded mobile infusion stands allow height adjustment and are equipped with wheels with brakes. The construction is robust and is newly fitted with a plastic rosette for added strength.

The infusion stands are supplied with several types of infusion holders as well as stainless steel storage trays, drip trays or stainless steel baskets.

# STANDS, STEPS, HOLDERS

Our portfolio of medical equipment also includes stainless steel urine bottle and bedpan racks, apron racks for X-ray workstations, surgery drape racks, steps and various stainless steel mobile racks.

Our products are characterized by a high degree of flexibility and allow customization according to the specific needs of a particular customer.

# CABINETS, TABLES, SINKS

Complete sets of furniture, carts and other equipment for nurses' stations, consulting rooms, rooms or other premises in healthcare or social care facilities.

Individual designs, according to your specifications. Customization of colour, parameters (e.g. load capacity), materials, etc.

In the production of sinks and cabinets we cooperate with the supplier of the best Italian sinks and stainless steel components, which has a large range of different sizes and shapes of sinks, both in AISI304 and AISI316 materials.

Based on the customer's special requirements, it is possible to offer a sink made to measure, which is almost indistinguishable from a classic molded sink.

# RACKS

We offer stainless steel racks with optional modular baskets or shelves. The shelves provide high variability and the possibility of creating any configuration. They are characterized by their solid and durable design and the baskets are tippable.

For storage of materials and equipment we offer hanging walls and wire products. They have stainless steel construction, hanging baskets, shoe holders or other types of holders. They are supplied with fasteners for fixing and offer the possibility of atypical designs.
